## **NRC TO MEET WITH FIRSTENERGY COMPANY TO DISCUSS SAFETY PERFORMANCE AT THE PERRY NUCLEAR PLANT**

The Nuclear Regulatory Commission will meet with FirstEnergy Nuclear Operating Company officials July 11 to discuss the NRC's annual assessment of safety performance at the Perry Nuclear Power Plant in Perry, Ohio.

The meeting will begin at 10 a.m. EDT and will be held at the plant's Training and Emergency Center, 10 Center Road, Perry. The public is invited to observe the session. NRC officials will be available afterwards to answer questions.

The annual assessment, referred to as the End-of-Cycle assessment, evaluates safety performance at the Perry plant from April 2000 through March 2001, and informs plant officials of the NRC's plans for future inspections at the facility.

The Perry assessment letter and inspection report are available at <http://www.nrc.gov/OPA/ppr> or from the Region III Public Affairs Office. Current performance information for the plant is available at <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.
