NRC NAMES NEW SENIOR RESIDENT INSPECTOR AT PADUCAH GASEOUS DIFFUSION PLANT

Nuclear Regulatory Commission officials in Lisle, Illinois, have announced the assignment of Bruce Bartlett as Senior Resident Inspector at the Paducah Gaseous Diffusion Plant in Paducah, Kentucky.

Bartlett, who began his duties at the Paducah plant September 23, joined the NRC in 1984 as a Resident Inspector at the Wolf Creek Nuclear Generating Station, northeast of Burlington, Kansas. In January of 1988, he was promoted to Senior Resident Inspector at Wolf Creek, and two years later he was assigned to the Callaway Nuclear Power Plant near Fulton, Missouri, as the Senior Resident Inspector. In August 1995, he moved to the D.C. Cook Nuclear Power Station near Bridgman, Michigan, where he worked as a Senior Resident Inspector until assuming his new assignment in Paducah.

Prior to joining the NRC, Bartlett worked for the Tennessee Valley Authority as a pre-operational test engineer at the Sequoyah Nuclear Power Plant and as a licensing engineer in Chattanooga for the Browns Ferry Nuclear Power Plant.

Bartlett earned both a bachelor's degree in nuclear engineering and a master's degree in engineering management from the University of Missouri in Rolla. Bartlett and his wife Donna live in the Paducah area.

Bartlett joins Resident Inspector Mary Lynne Thomas at the Paducah plant. They can be reached at (270) 442-7118.
