NRC TO MEET WITH WOLF CREEK NUCLEAR OPERATING CORP. TO DISCUSS PERFORMANCE OF WOLF CREEK

Nuclear Regulatory Commission staff will meet with representatives of Wolf Creek Nuclear Operating Corp. on Thursday April 3, to discuss the results of the agency's annual assessment of safety performance at the Wolf Creek Generating Station. The facility is located near Burlington, Kansas, and is operated by WCNOG.

The meeting, which will be open to the public for observation, is scheduled to begin at 6:00 p.m. at the Coffey County Courthouse, 110 South 6th Street, Burlington.

Before the session is adjourned, NRC staff will be available to answer questions from the public on the safety performance of the plant, as well as the role of the NRC in ensuring safe plant operation.

The performance period to be discussed is January 1 to December 31, 2002. In addition, NRC staff will provide an overview of how the agency's Reactor Oversight Process works.

A letter sent from the NRC Region IV Office to representatives of WCNOG addresses the performance of the plant during the period and will serve as the basis for the meeting discussion. It is available on the NRC web site at:

http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/LETTERS/wc_2002q4.pdf

"Overall, Wolf Creek Generating Station operated in a manner that preserved public health and safety and fully met all cornerstone objectives," the letter says, noting the NRC staff plans to conduct only baseline inspections during 2003.

In addition, the letter notes: "As you are aware, since the terrorist attacks on September 11, 2001, the NRC has issued several Orders and threat advisories to enhance security capabilities and improve guard force readiness. We have conducted inspections to review your implementation of these requirements and have monitored your actions in response to changing threat advisories. For calendar year 2003, we plan to continue these inspections and conduct portions of the security baseline inspection program, as well as perform additional inspections to evaluate your compliance with new requirements that may be ordered."

Current performance information for Wolf Creek is available on the NRC web site at:
