NEW INSPECTOR NAMED AT VERMONT YANKEE

The Nuclear Regulatory Commission Officials in King of Prussia, Pa., have appointed Beth E. Siemel as the new resident inspector at Vermont Yankee, in Vernon, Vt. The plant is operated by Entergy Nuclear Generation Company.

Siemel joins Senior Resident Inspector David Pelton at Vermont Yankee. She replaces Resident Inspector Ed Knutson, who was reassigned to the Nine Mile Point nuclear power plant in Scriba, N.Y.

Siemel joined the NRC in 1990, and was a Reactor Engineer Intern in the Regional Office in King of Prussia, Pa. As an intern, she completed several assignments in Region I and in the Office of Nuclear Reactor Regulation, including an assignment in the Peach Bottom resident office (in Delta, Pa.). Following completion of the intern program, Siemel was a reactor engineer in the Region I Systems Section. She has worked as a resident inspector at the March 25, 2003 Pilgrim Nuclear Power Station in Plymouth, Mass., and, most recently, at Millstone Station in Waterford, Conn.

Siemel is a graduate of Rensselaer Polytechnic Institute in Troy, N.Y., where she earned a Bachelor of Science degree in nuclear engineering.

Each U.S. commercial nuclear power plant has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and interfacing with plant workers and the public.

The resident inspectors at Vermont Yankee can be reached at 802/257-4319.
