NRC NAMES NEW RESIDENT INSPECTOR AT DAVIS-BESSE NUCLEAR POWER PLANT

The Nuclear Regulatory Commission has selected Tom Briley as the new Resident Inspector at the Davis-Besse nuclear power plant in Oak Harbor, Ohio, approximately 20 miles southeast of Toledo. The nuclear power facility is operated by FirstEnergy Nuclear Operating Co.

Each commercial nuclear power plant site in the United States has at least two Resident Inspectors who monitor day-to-day operations at the plant. Briley joins Senior NRC Resident Inspector Dan Kimble at the Davis-Besse facility.

“Tom Briley’s background and regulatory experience will assist the NRC in carrying out its mission of protecting people and the environment and ensuring the safe operation of nuclear power plants,” said Region III Administrator Charles Casto.

Briley received his bachelor’s degree in 2008 and his master’s degree in 2009, both in nuclear engineering and radiological sciences from the University of Michigan.

Following graduation, he joined the NRC in 2009 as a reactor engineer in the Nuclear Safety Professional Development Program and graduated in 2011. After successfully completing the agency’s inspector qualification program, he served as acting Resident Inspector at Dresden nuclear power plant in Illinois.

The NRC Resident Inspectors have offices at the Davis-Besse plant and can be reached at (419) 244-4494.
