No. 13-029

April 16, 2013

NRC ADVISORY COMMITTEE ON THE MEDICAL USE OF ISOTOPES NAMES NEW LEADERSHIP

The Nuclear Regulatory Commission has named [Bruce Thomadsen, Ph.D.](#), as Chairman of the Advisory Committee on the Medical Use of Isotopes and [Milton Guiberteau, M.D.](#), as Vice-Chairman. The chairman and vice chairman are appointed by the director of NRC's Office of Federal and State Materials and Environmental Management Programs. Former ACMUI Chairman [Leon Malmud, M.D.](#), has ended his term after 11 years of service and leadership on the committee.

The ACMUI, a group of experienced health care professionals, advises the NRC on policy and technical issues that arise in the regulation of medical uses of radioactive materials in diagnosis and therapy. The ACMUI members come from various disciplines and comment on changes to NRC regulations and guidance; evaluate certain non-routine uses of radioactive material; provide technical assistance in licensing, inspection and enforcement cases; and bring key issues to the Commission's attention for appropriate action.

A complete listing of the ACMUI membership, their bios and public meeting schedule can be found on the ACMUI [web page](#).
